

#NoMoreButts Recycling Contract Between TerraMar and Participating Business

We at The TerraMar Project (TMP) plan to work with _____ (business name) to help facilitate the collection and recycling of cigarette butt waste. TMP will provide the participating business with Signage, Pocket Ash Trays, and free shipping labels to mail in the waste. TMP will also agree to host an optional training for the business' staff.

_____ agrees to have at least one recycling receptacle strategically placed at their location, and to designate one (or multiple) employees as responsible for managing the waste. This includes collecting, packaging, and shipping the waste to TerraCycle's facility in New Jersey (USA participants).

These employees will be recognized by TerraMar as volunteers in our #NoMoreButts recycling program, and may use this experience on their professional resumes.
